DETAILED ACTION

Allowable Subject Matter

Claims 25,26,28,31-33,36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 20,24 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 34 of copending Application No. 11/361061. Although the conflicting claims are not identical, they are not patentably distinct from each other because the exact type of pull cord motor used would have been a design choice only once this type of motor was known.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 103

Claims 20-22,27,29,30,38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yip '483. This patent shows a food processor/peeler including cup 30, cover 20, and plastic blades 44. It is not clear from the patent what type of plastic forms the blades. Elastomeric material is well known for its' durability, cheapness in replacement, etc. In order to reduce maintenance costs, it would have been obvious at the time of the invention to modify Yip '483 by using elastomeric material as the blade material since the use of elastomeric material is well known in the art and of no patentable merit. The remaining limitations of these claims would have been obvious design choices only once the basic apparatus was known.

Response to Arguments

Applicant's arguments filed 11/1/06 concerning the above rejected claims have been fully considered but they are not persuasive. Claim 20, for example, is broad enough to be mostly read on Yip '483. In this claim, the cup is equivalent to Yip '483 element 30, the arm is equivalent to patent arm 44, the means for rotating the arm is patent element 22, and patent element 34 is equivalent to applicant's stop block. Contrary to applicant's remarks, the patent's element 34 redirects the material presented to it which reads on applicant's 'interrupting the free spinning rotating of food'.

Nowhere in the claim does it state that the material is completely blocked from further forward movement as applicant appears to be arguing.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
